MEMORATIZEM FOR: Project Director

SULISCT:

Reproduction Responsibilities of the DD/I Photo

Intelligence Photographic Laboratory

- 1. The original concept of the expanded Photo Intelligence organisation was to provide only sufficient photographic reproduction facilities necessary to fulfill Agency requirements. The existing organisation and budget has been based on these limited repreduction facilities.
- 2. It has been indicated at various times that the DD/I Photo Intelligence reproduction facilities will be charged with the responsibility for providing material, on a selective basis, to Agencies and services other them CIA. To fulfill this requirement will entail an increase in personnel and budget ceilings which must be instigated immediately. In addition to personnel and funds, it is essential that plans be prepared for the laboratory and the preper equipment be placed on order.
- 3. In view of the above, it is requested that a definite policy be established for preparation of additional photographic materials other than those received by CIA.
